Gid kout: plizyè WR sou yon sèl cargo

JP's Logistics & More

Kreye cargo a, mete WR yo sou li, epi voye l

Pou moun k ap prepare shipment yo

Vèsyon 6 novanm 2026 · Egzanp yo fèt ak kliyan simile (Marie Joseph #1001): done yo se tès.

Kontni

A Kreye cargo a

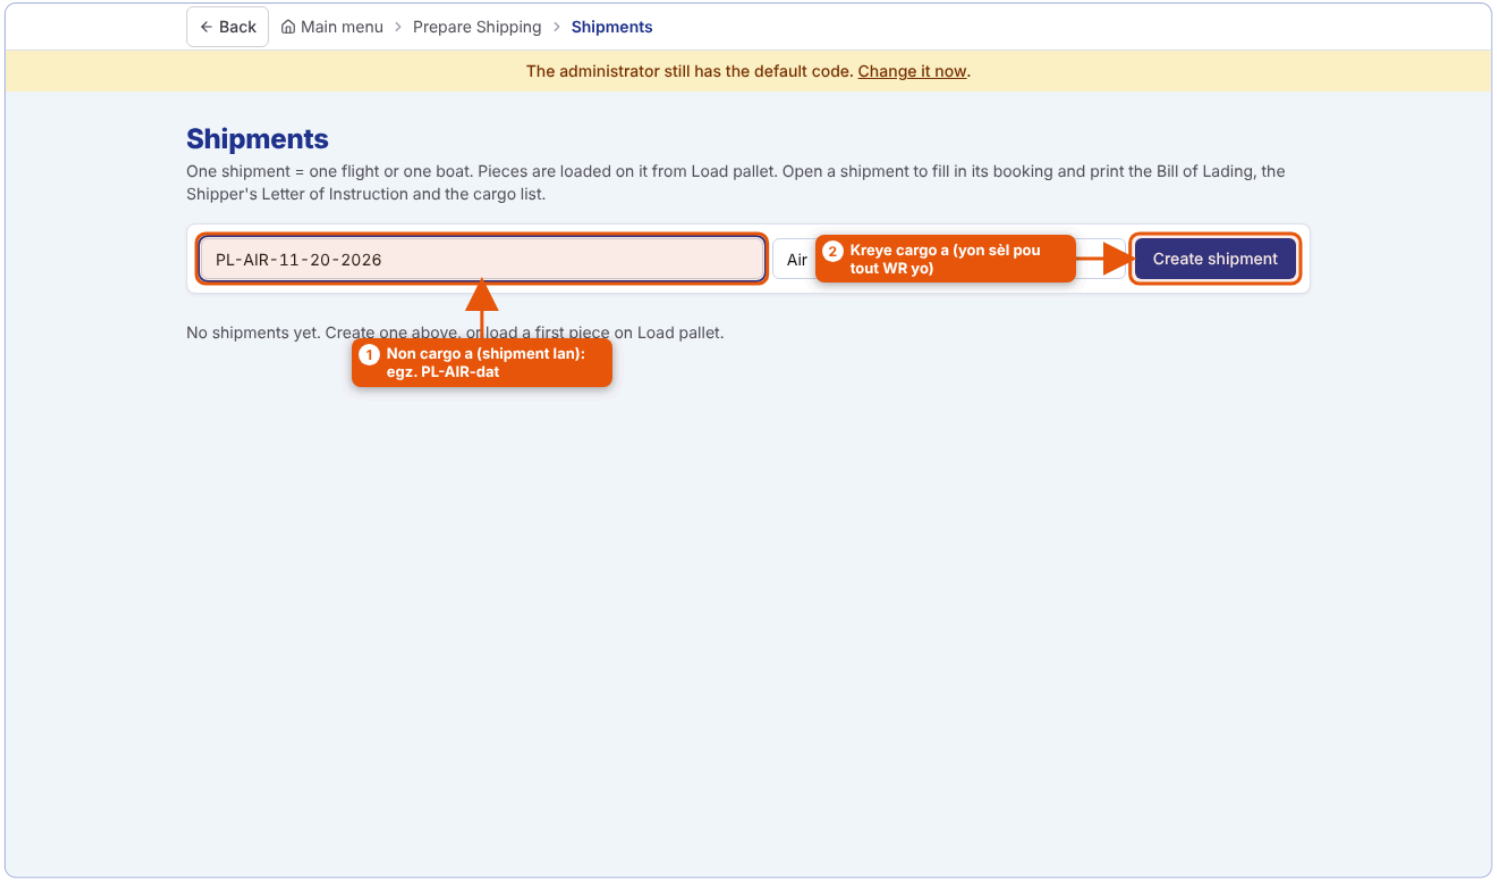

B Mete plizyè WR sou cargo a

C Depi paj WR a

D Voye cargo a

E Règ ak mesaj erè

A Kreye cargo a

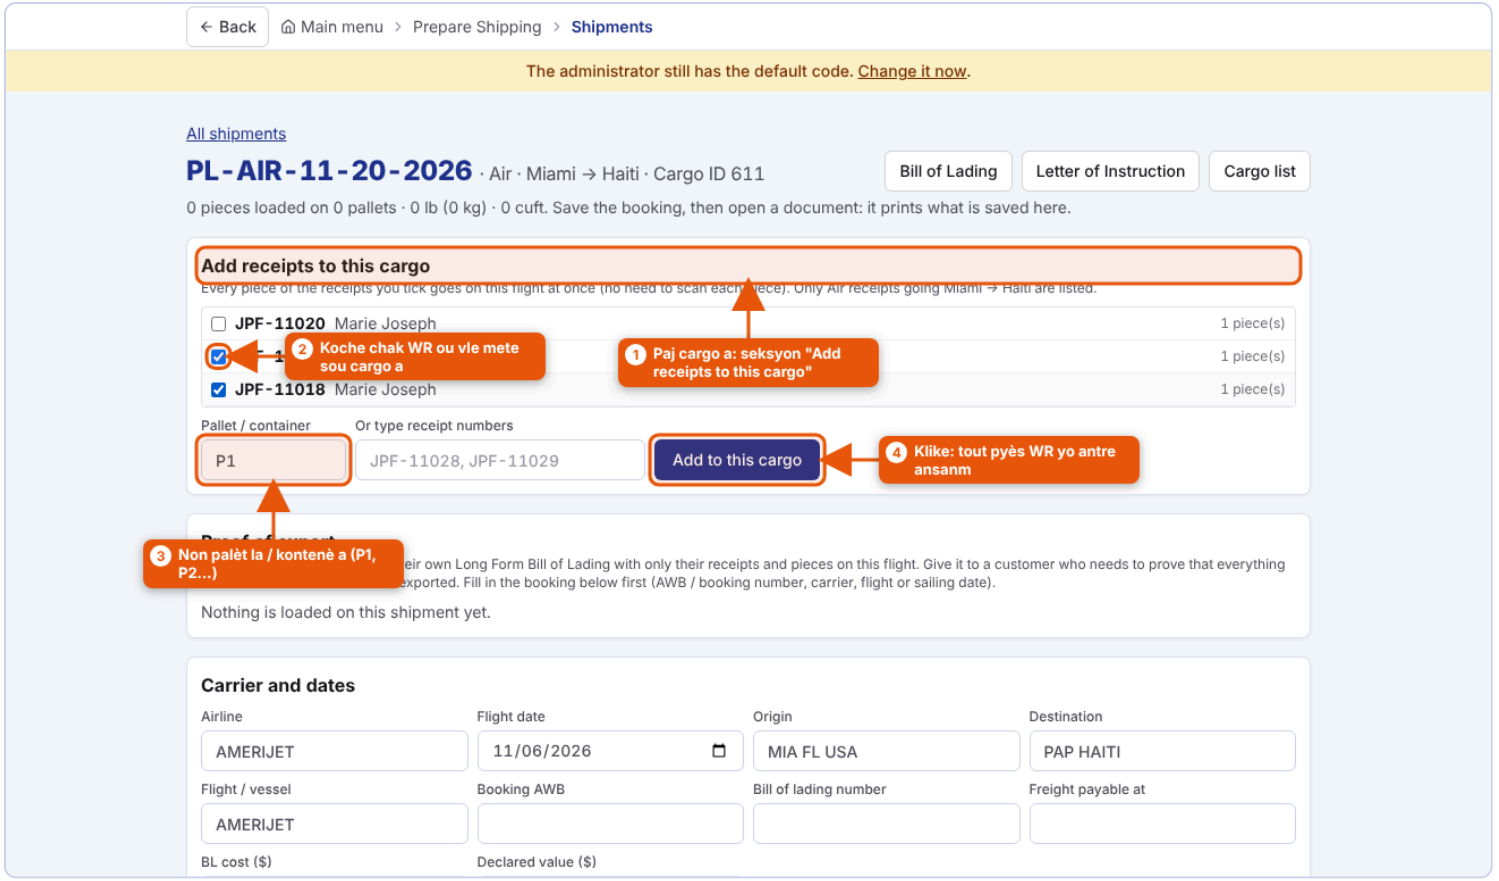

Pou kisa: Yon cargo (shipment) pou tout WR yo.

Meni → Prepare shipping → Shipments. Ekri non cargo a (egzanp PL-AIR-dat), epi klike "Create shipment". Shipment ak cargo se menm bagay: gen yon sèl Cargo ID.

1. Non cargo a (shipment lan): egz. PL-AIR-dat
2. Kreye cargo a (yon sèl pou tout WR yo)

Retni: Yon shipment = yon cargo. Pou separe pyès yo, itilize plizyè palèt (P1, P2...) andedan menm cargo a.

B Mete plizyè WR sou cargo a

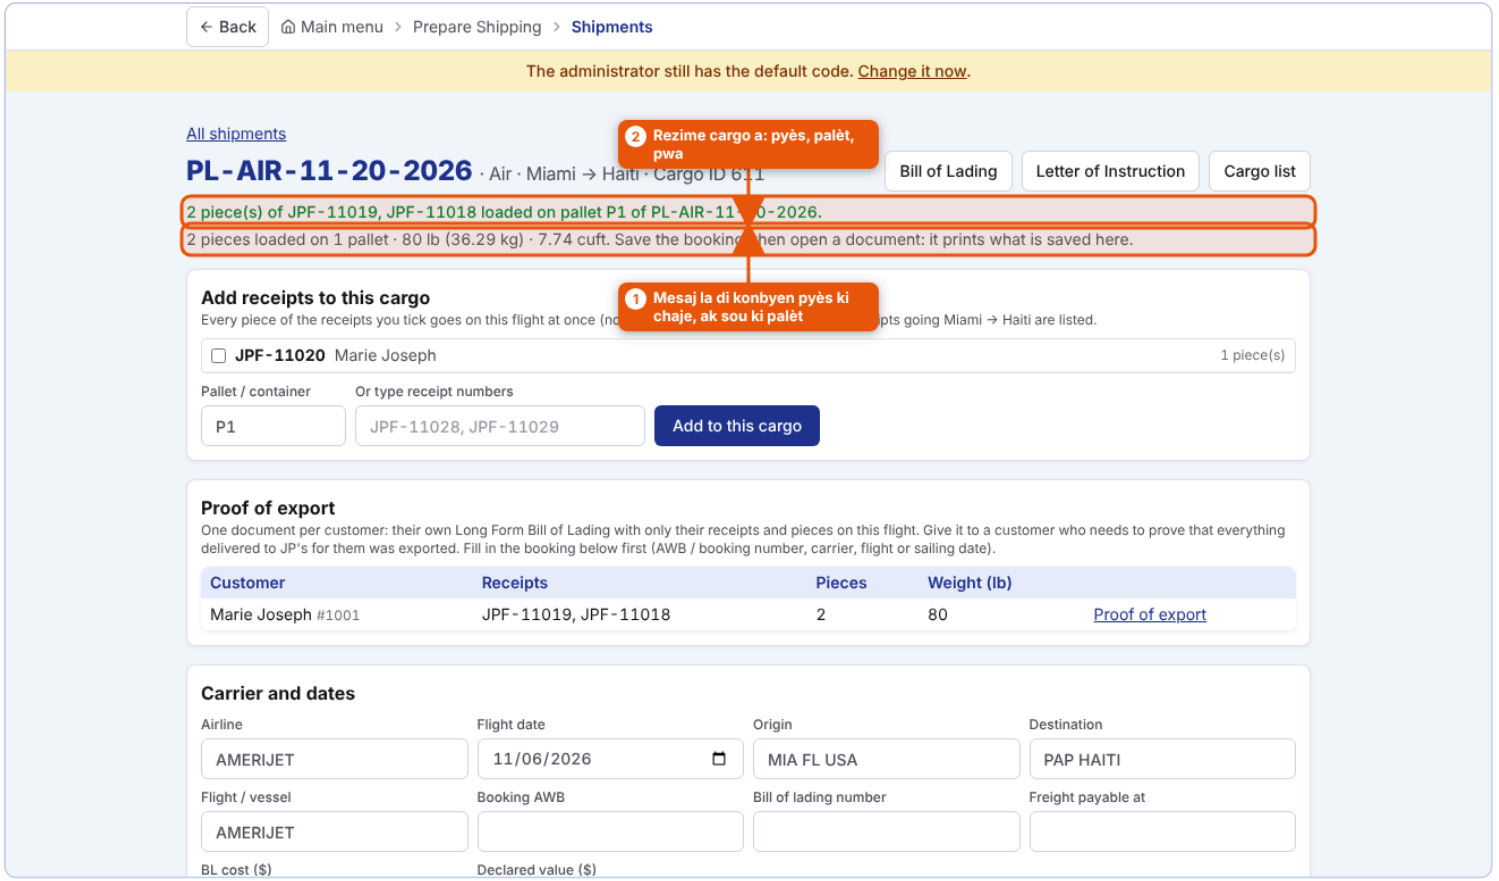

Pou kisa: Tout pyès WR yo antre ansanm.

Louvri cargo a. Nan seksyon "Add receipts to this cargo", koche chak WR ou vle (lis la montre sèlman WR ki menm tip Air/Ocean ak menm direksyon, epi ki poko chaje). Mete non palèt la, epi klike "Add to this cargo". Ou ka tape nimewo yo tou: JPF-11028, JPF-11029.

1. Paj cargo a: seksyon "Add receipts to this cargo"
2. Koche chak WR ou vle mete sou cargo a
3. Non palèt la / kontenè a (P1, P2...)
4. Klike: tout pyès WR yo antre ansanm

B Mete plizyè WR sou cargo a

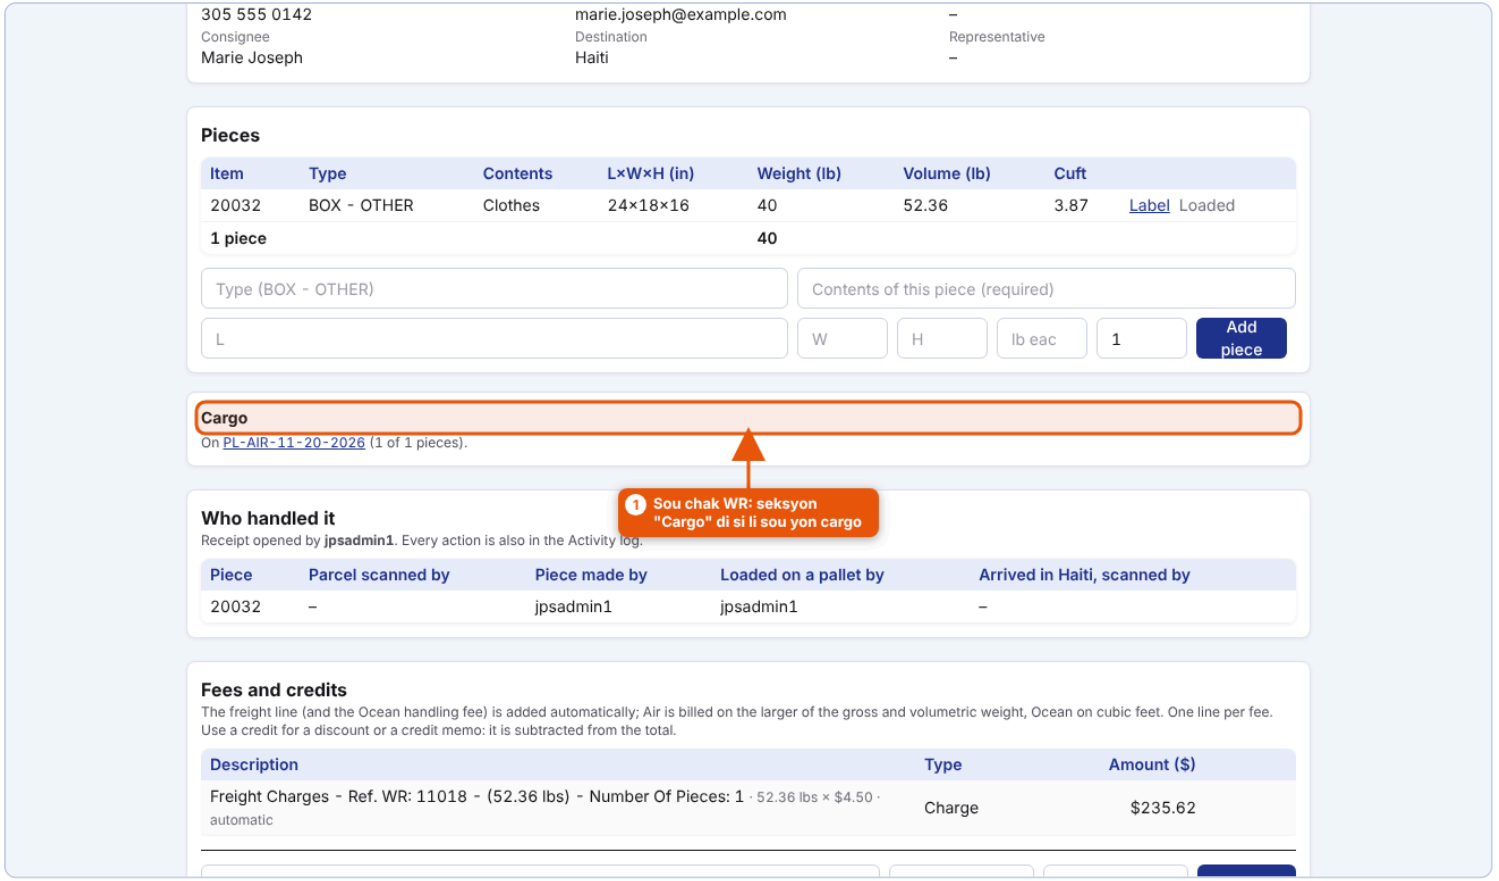

Mesaj vèt la di konbyen pyès ki chaje ak sou ki palèt. Rezime cargo a ak tablo "Proof of export" montre pyès yo, palèt yo, pwa a ak kliyan yo.

1. Mesaj la di konbyen pyès ki chaje, ak sou ki palèt
2. Rezime cargo a: pyès, palèt, pwa

> **Retni:** Pa bezwen scanner pyès yo youn pa youn.

C Depi paj WR a

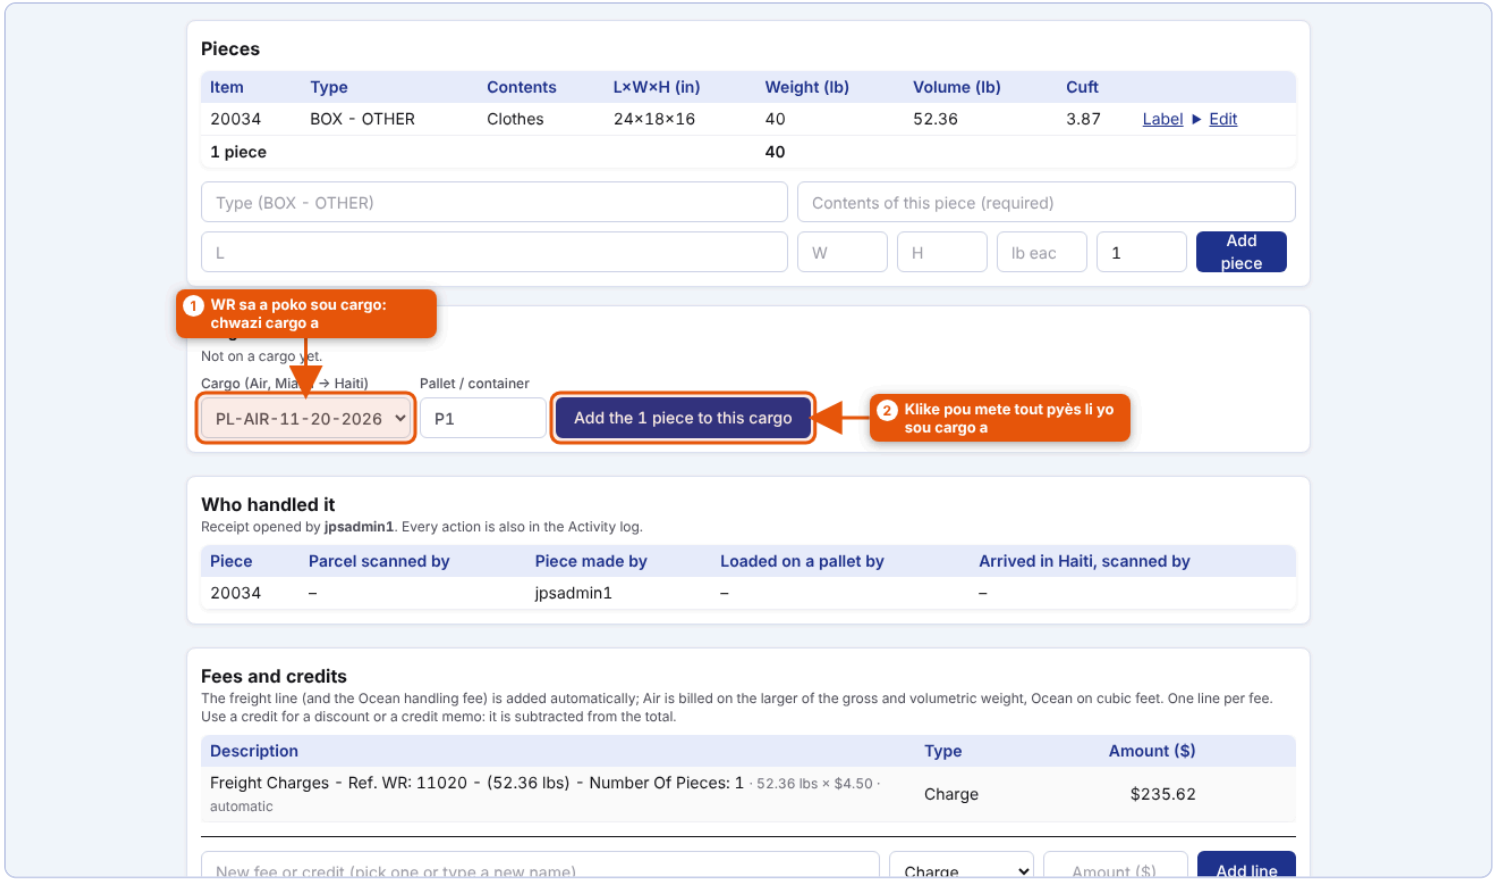

> **Pou kisa:** Pou yon sèl WR, oswa pou verifye ki kote li ye.

Sou chak WR, seksyon "Cargo" di si WR a sou yon cargo (ak ki sa), epi konbyen pyès ki chaje.

1. Sou chak WR: seksyon "Cargo" di si li sou yon cargo

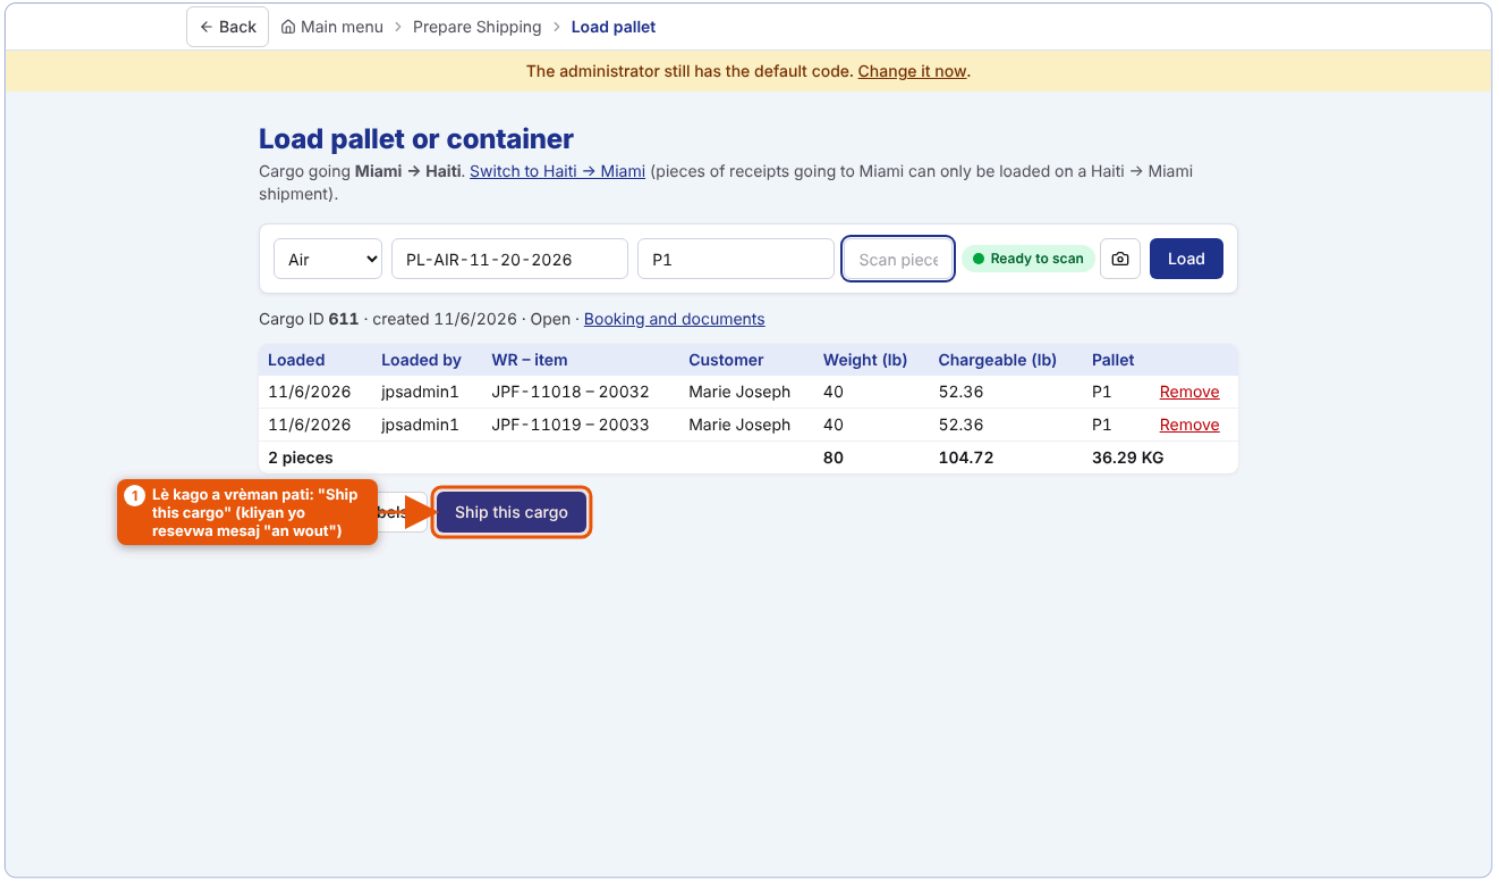

C Depi paj WR a

Yon WR ki poko sou cargo: depi paj WR a, chwazi cargo a, mete palèt la, epi klike "Add the N piece(s) to this cargo". Menm bagay, men pou yon sèl WR.

1. WR sa a poko sou cargo: chwazi cargo a
2. Klike pou mete tout pyès li yo sou cargo a

D Voye cargo a

Pou kisa: Kliyan yo resevwa mesaj "an wout".

Lè kago a vrèman pati: Load pallet (oswa paj shipment lan) → "Ship this cargo". Kliyan yo resevwa mesaj "koli ou an wout" (imèl + WhatsApp).

1. Lè kago a vrèman pati: "Ship this cargo" (kliyan yo resevwa mesaj "an wout")

Retni: Si ou fè erè, administratè a ka re-ouvri cargo a ak "Reopen".

E Règ ak mesaj erè

Kisa ki posib

- **Plizyè WR sou yon sèl cargo:** wi. Koche yo sou paj cargo a, oswa mete yo youn pa youn depi paj WR a.
- **Plizyè shipment nan yon sèl cargo:** non. Yon shipment = yon cargo (yon Cargo ID). Pou separe pyès yo, itilize plizyè **palèt/kontenè** (P1, P2…) andedan menm cargo a.
- **Yon WR sou plizyè cargo:** wi. Mete kèk pyès sou yon cargo, lòt yo sou yon lòt (scanner yo nan Load pallet).

Si sistèm lan refize

- **"is Air but … is Ocean":** WR a ak cargo a pa menm tip. Chwazi yon lòt cargo.
- **"has no pieces yet":** WR a poko gen pyès.
- **"already loaded":** li deja sou yon cargo.
- **"already shipped":** cargo a deja pati. Administratè a ka re-ouvri l.
- **Direksyon:** koli ki prale Ayiti → Miami pa ka sou yon cargo Miami → Ayiti.
